

Facility Self-Assessment for Ohio HME Regulation

The Ohio home medical equipment (HME) licensure act was enacted on September 16, 2004, requiring certain HME service providers to obtain a license or certificate of registration to provide HME services in Ohio. **Ohio law requires only those facilities providing specific HME services to the public to obtain a license or be registered with a designated accrediting body.** Under Section 4752.01 (C) of the Revised Code, HME Services are defined as, "the sale, delivery, installation, maintenance, replacement, or demonstration of home medical equipment." Section 4752.01 (B) of the Revised Code broadly defines HME as, "equipment that can stand repeated use, is primarily and customarily used to serve a medical purpose, is not useful to a person in absence of illness or injury, is appropriate for use in the home, and is one or more of the following:

- (1) Life-sustaining equipment prescribed by an authorized health care professional that mechanically sustains, restores, or supplants a vital bodily function, such as breathing;
- (2) Technologically sophisticated medical equipment prescribed by an authorized health care professional that requires individualized adjustment or regular maintenance by a home medical equipment services provider to maintain a patient's health care condition or the effectiveness of the equipment;
- (3) An item specified by the Ohio respiratory care board in rules adopted under division (B) of section 4752.17 of the Revised Code.

Because this law is not applicable to all HME providers, the State of Ohio Board of Pharmacy encourages the use of this form to help you determine if you may qualify for a license or certificate of registration. If, after completing this form, you determine you qualify for an HME license or certificate of completion, you may obtain an application on the Board's website <https://elicense.ohio.gov>.

Step 1: Evaluating the exceptions to meeting the licensure requirements under Chapter 4752 of the Revised Code.

Section 4752.02 (B) of the Revised Code excludes specific entities from the licensing and certificate of registration requirements. Please review the following list. If you mark yes to any of the exceptions below, your business might not require a license or certificate of registration to operate in Ohio. The Board urges you to seek legal counsel to verify whether your business requires a license.
