**Certification and Continuing Education Requirements**

As part of the renewal process and as a condition of maintaining a valid Ohio registration, a certified pharmacy technician is required to maintain a pharmacy technician certification (ExCPT or PTCB).

A certified technician must meet the continuing education requirements for their pharmacy technician certification (ExCPT or PTCB). Any certified technician who holds a valid certification is not required to complete the ten contact hours that is required for a registered pharmacy technician. A certified pharmacy technician does not need to report any continuing education directly to the Board of Pharmacy.

Failure to maintain an ExCPT or PTCB certification may result in disciplinary action by the Board. Therefore, all Ohio certified technicians should make sure they have valid certifications prior to renewing their registration.

If a certified pharmacy technician no longer wants to maintain their ExCPT or PTCB certification, the applicant will be required to re-apply as a registered pharmacy technician.
