FINDINGS OF FACT

After having heard the testimony, observed the demeanor of the witnesses, considered the evidence, and weighed the credibility of each, the Board finds the following to be fact:

1. On or about March 11, 2020, while Michael Martinelli was working at RC Compounding, located at 2020 Center Road, Poland, Ohio, prescriptions #188064CR and #186293R were compounded for Patient 1. On or about March 12, 2020, prescription #188064CR for Biest 80/20 0.25 mg + 0.25 mg testosterone and prescription #186293R for progesterone 30 mg/0.5 ml were dispensed to Patient 1; however, the prescription labeled as progesterone 30 mg/0.5 ml, contained testosterone 26 mg/0.5ml.
2. The investigation revealed, on or about March 11, 2020, the certified pharmacy technician who compounded the medications chose testosterone powder instead of progesterone powder prior to compounding the cream labeled as progesterone 30 mg/0.5 ml. A positive ID indicates Michael Martinelli verified and took responsibility for the dispensing of the prescriptions after the

compounding was complete. Michael Martinelli reviewed each of the compounding records and found the weights, calculations, and records to be accurate. However, Michael Martinelli did not verify the compounding ingredients prior to the compounding taking place. Investigation revealed this was standard operating procedure at RC Compounding.

3. Patient 1 used the topical medications as prescribed and experienced changes in behavior and appearance consistent with an excessive amount of testosterone. Patient 1 also experienced unusually high total testosterone blood levels collected on 3/24/20 (1277 ng/dl) and 4/20/20 (1384 ng/dl). The normal range of total testosterone in a female the same age as Patient 1 is 2-45 ng/dl.
4. RC Compounding provided to the Board a July 7, 2020 internal report summarizing the error in dispensing and stating the isolated event was likely caused by the technician mistakenly choosing a bottle containing testosterone instead of progesterone. The report also included changes to the pharmacy's standard operating procedures including a step for pharmacists to verify the ingredients of compounds prior to the technician completing the compounding process.
5. On or about July 15, 2020, Michael Martinelli spoke with an agent of the Board. Michael Martinelli stated the following:
 - a. Michael Martinelli was the pharmacist responsible for the compounding of Rx#186293R on 3/11/20 and the error in dispensing.
 - b. Michael Martinelli explained the process of pharmacist verification at the time of the error in dispensing, stating pharmacists do not verify the ingredients prior to the technician compounding.
 - c. Pharmacist dispensing verification is to review the compounding record, including a review of the weights and assuring calculations are correct, but this occurred after the compounding was completed by the technician.
 - d. Michael Martinelli believed the error was caused by the technician pulling testosterone powder instead of progesterone powder.
