To mitigate possible ongoing workforce shortages due to the COVID-19 outbreak, the State of Ohio Board of Pharmacy has adopted the following resolution to permit pharmacy technician trainees to stock automated pharmacy systems and automated drug storage systems at a location licensed as a terminal distributor of dangerous drugs, subject to certain conditions.

As used in this resolution, an "automated drug storage system" means a mechanical system used for the secure storage of dangerous drugs used as floor stock or contingency drugs. An "automated pharmacy system" means a mechanical system that performs operations or activities other than administration, relative to storage, packaging,

compounding, dispensing, or distribution of dangerous drugs that collects, controls, and maintains transaction information and records.

A pharmacy technician trainee may stock an automated drug storage system or automated pharmacy system if all the following conditions are met:

1. The automated system utilizes a barcode scanning system at the fill station.
2. For automated drug storage system only: the system or the electronic health record used to administer drugs utilizes barcode medication administration (BCMA).
3. Pharmacy technician trainees must complete documented training on stocking an automated drug storage system or automated pharmacy system.
4. The terminal distributor of dangerous drug must develop and implement a quality assurance program to track the accuracy of the technician restocking the automated systems, such as medication error reporting and resolving fill errors immediately.
5. A pharmacy technician trainee may stock automated drug storage systems, at a location licensed as a terminal distributor of dangerous drugs if a pharmacist is not physically present at the licensed location and all the following apply:
 - i) A pharmacist is readily available to answer questions of the technician;
 - ii) A pharmacist is responsible for conducting routine verifications of the activities of the technician to prevent the diversion of dangerous drugs;
 - iii) A pharmacist is fully responsible for all activities conducted by the technician at the licensed location. This resolution shall remain in effect until rescinded by the Board.

To promote the safe compounding of sterile products, the State of Ohio Board of Pharmacy has adopted the following resolution to permit licensees to perform sterile compounding for another licensee, referred to as central compounding.

As used in this resolution “originating facility” means the facility where compounded medication administration occurs and “compounding facility” means the facility where drugs are compounded for the originating facility. For a terminal distributor of distributor drugs (TDDD) to compound for another licensee, the TDDD must comply with all the following:

- The compounding facility is responsible for compliance with chapters USP 797 and 795 and rule 4729-16-04 of the Administrative Code.
- The compounding facility and the originating facility (i.e. where the medication administration occurs) are under common ownership.
- Only patient-specific compounded sterile products (CSPs) are permitted. No batch compounding of CSPs shall be provided to the originating facility.
- All CSPs must comply with appropriate labeling of CSPs in accordance to OAC 4729- 17-10. In addition, the label must also include the name and address of the compounding facility. This may be achieved by affixing an auxiliary label on the CSP.
- All areas where dangerous drugs and devices are stored shall be dry, well-lighted, well-ventilated, and maintained in a clean and orderly condition. Transportation and storage of the CSPs shall be maintained at temperatures which will ensure the integrity of the drugs prior to their use as stipulated by the USP/NF and/or the manufacturer's or distributor's labeling unless otherwise directed by the board.
- Unused, patient-specific CSPs may be returned to the compounding facility for appropriate disposal only. Returned CSPs to the compounding facility shall not be reused or redispensed.
- Unused, patient specific CSPs may be reused at the originating facility if stored under appropriate conditions.

- The compounding and originating facility must maintain appropriate recordkeeping for each licensee in accordance to OAC 4729-16-06, 4729-9-22, 4729-9-14, 4729- 17-04.

This resolution shall remain in effect until rescinded by the Board or a rule on central compounding is promulgated by the Board.
